1. Introduction to Paint

About Paint: Paint, also known as digital painting software allows you to create artwork on a digital canvas using various digital tools.

Here are some of the benefits of digital painting:

No Mess: Unlike traditional painting, there's no need for Paint, water, or messy clean-up. All your supplies are on your computer or tablet.

Undo and Redo: Did you make a mistake? No problem! You can undo your actions and try again, which makes digital painting great for learning.

Endless Options: You can easily change colors, resize elements, and experiment with different techniques without worrying about running out of Paint or paper.

Learning a Digital Art: Creating digital art and learning a software can open many career pathways in the future.

"Adobe Photoshop is like a special magic art tool on a computer. It helps people make pictures look better and do fun things with them."

Here's what you need to know:

Picture Helper: Photoshop can help make photos brighter, remove things you don't want, and even make colors more exciting.

Artist's Studio: People use Photoshop to create amazing art. They can draw, paint, and add special effects to their pictures.

Photo Fun: You can add words and designs to photos, like making a birthday card with your drawings and messages.

Mixing Pictures: Photoshop helps you put many pictures together to make one big picture, like a puzzle or a collage.

Magical Filters: There are magic filters that can make photos look like drawings or give them funny colors.

So, Photoshop is like a magic art studio inside your computer where you can make pictures look fantastic and create your art. It's like a digital playground for artists!"

If your teacher has more Adobe apps installed on your computer, you can ask them to let you try different apps from Creative Cloud, such as Illustrator or Design.
